Very simple to take advantage of this opportunity

- Its simple, you either lease to own or be renting our batteries to reduce power bill and we share the power savings with you.
- If renting, we maintain and manage the batteries. We use reliable battery systems at our own factory at lingtech or use GE, Exro, Evlo, LG, Tesla power one.
- We enter into a purchase power agreement (PPA) to protect yourself from constant rising energy costs
- We do everything, easily installed in your existing utility rooms and storage areas
- Simply provide us a copy of the last 12 months of power bills for us to asses your savings.

How it works

We have eliminated these high on-peak at 28.6cents /KWH and mid-peak at 12.2 cents/KWH utility power rate charges

We charge the batteries at night when power is at 2.8 cents/KWH and use the stored power during the day during on-peak and mid-peak hours. Creating a HUGE savings for you.
